Untitled attachment 00262.txt

Hello Rick,

Here is our report for the meeting tomorrow. We identified approx. \$72,000 in cost reductions resulting from errors, items that are not within the scope of insurance, higher rates than Xastimate and errors in sq feet. We have a lot of data thanks to Rita's efforts but we tried to boil it down to a small package to present that captures the essence of what we found. I think giving Elias the Flood Insurance Adjuster report will be a great start in keeping numbers and names and costs in a comparable fashion moving forward. I hope Elias does not find our recommendations out of line. Ed
